last century....

Do you still spend your precious time determining the bulk density of your growing media according to EN12580 by hand?

When you want to do it accurately it is very time-consuming, if you are in a hurry, the results can deviate as much as 20%.

**INADCO's Densimeter does it all for you!!
Accurate and fully automatic.**

Easy to implement in your bagging- , baling- or mixing line.

Various options are possible:

- Stand alone
- or combined with:
 - a printer
 - a (certified) Belt Weigher
 - a data storage device
 - a connection with your factory automation
 -

Contact us for more specific information or look at our website.

The yellow shovel takes samples from the belt and drops them in the black CEN Measuring Cylinder (with white bottom).
